

Stimplex enhances root growth and early plant development

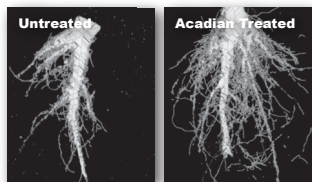

Successfully Applied on Over 80 Crops in 70 Countries

Stimplex improves early plant development and root growth; both vital to your crops' success. Growth, quality and yield all depend on a strong plant with a large, healthy root system. Trust **Stimplex** to start your plant off right.

Stimplex Extract has been proven to:

- Improve desirable yield
- Improve overall plant health
- Elicit cytokinin and auxin production
- Maximize natural plant resistance to a variety of stresses including drought, salinity and temperature
- Increases nutrient levels
- Improve root growth and early plant development

Plants with stronger root systems make the most efficient use of water and nutrients and are better able to withstand transplant shock allowing for faster establishment in the field. **Stimplex** improves early root and plant development, having been demonstrated on a wide range of crops and plants. **Stimplex** gives your plant the best start possible.

2008 Greenhouse Lettuce Trial, Dr. James S. Craigie Research and Development Center, Canada

Left. This picture shows root scans of lettuce plants using a *WinRhizo* root scanner 54 days after planting. **Stimplex** treatment showed significantly

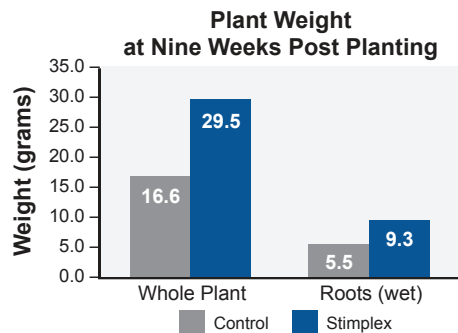

improved root development and **doubled the number of small roots** over the control.

2008 Greenhouse Lettuce Trial, Dr. James S. Craigie Research and Development Center, Canada

The pictures above confirm **Stimplex** treated lettuce seedlings had an improved root system and top growth. **Stimplex** treated leaves are stronger and less spindly making them more attractive.

The graph below confirms **Stimplex** improves plant weight. In the **Stimplex** treated plots, the roots alone weighed 69% more

2007 Strawberry Field Trial, Ventura County, California

than the control. As a result of this improved early root growth and development, **strawberry yield increased by 19%** and translated into a substantial increase in grower's income.

Stimplex is a leading organic biostimulant that induces positive cytokinin activity to increase crop yield. Manufactured by **Acadian AgriTech**, **Stimplex** is organically certified and EPA registered giving you the confidence to know you are getting a high quality organic compliant product with proven results. It is exclusively derived from one of the most active seaweed species in the world, hand harvested to preserve the base of the plant, guaranteeing it will grow back. We use a gentle extraction process that ensures maximum performance. **Stimplex** is supported by credible research assuring you buy a consistent, top quality product you can trust. This is why top growers count on **Stimplex**; it doesn't just grow your crop, it grows a better crop.

Trust the **Stimplex** Advantage, Be Rewarded.
